WORK EXPERIENCE:

• Product Developer

Inncircles

2022-Present

- Led frontend development efforts using Angular, creating interactive and user-friendly web applications.
- Implemented responsive design techniques, ensuring optimal user experience across various devices and screen sizes.
- Utilized frontend frameworks and libraries like Angular, HTML, CSS, and JavaScript to develop modular and reusable components.
- Integrated frontend components with backend APIs, collaborating with backend developers to ensure seamless data flow and functionality.
- Worked with MongoDB to handle data retrieval and storage, performing basic CRUD operations when required.

PROJECTS:

Portfolio Application:

I've developed a Angular application to showcase my professional information. It presents my experience, skills, projects, education, and contact details in a visually appealing manner.

[MounikaVarshiniPortfolio](#)

Quiz Application:

Engage in a user-friendly Javascript application where admins upload questions, users answer, and view scores, fostering an interactive and seamless experience.

[QuizTime](#)

Games:

Built 2 Games using Java Script.

1. [WinRace](#) Car Game (Desktop version).

2. [DiceToss](#) (2 players).

Built Few Websites using HTML5 and CSS3.
